This listing of claims will replace all prior versions and listing of claims in application:

Listing of Claims

1. (Currently Amended) A foldable luggage bag comprising, in combination:

a first lesser capacity, partial bag made from a flexible material and including an outside surface with a front panel, ~~and an open-periphery opening~~ opposite said front panel with a first closed loop peripheral fastening mechanism extending around the ~~open-periphery opening, a side panel between the front panel and the opening comprising a first bag interior,~~ and a separate access opening to the bag interior of said first bag;

a second ~~flexible~~ partial bag ~~made from a flexible material and~~ of greater capacity than the first bag, said second bag ~~formed of flexible material with an outside surface including a lateral side surface formed at least in part by the outside surface of said first bag, said second partial bag including a separate section integrally attached to and~~ attached to the first bag and extending from the ~~open-periphery opening~~ of the first bag with the first peripheral fastening mechanism maintained on the first bag outside surface to enable forming a bag enclosure comprised of the volume of the first bag and a portion of the second bag, said second bag further including a second closed loop ~~fastener~~ fastening mechanism on the second bag outside surface, ~~of said separate section, said second fastener~~ fastening mechanism encircling said portion of said second bag and having the same length as the first fastening mechanism and also fully attachable along its length to the first fastening mechanism, said second ~~fastener~~ fastening closed loop mechanism ~~encircling a part of the separate section of said second bag outside surface and~~ subtending the front panel of the first partial bag, upon the unfolding of said first and second bags whereby the first ~~fastener~~ fastening mechanism and the second ~~fastener~~ fastening

mechanism may be connected along their entire closed loop length to enclose ~~a portion of the separate section of the second bag~~ at least partially within said first bag interior within a volume comprised of the first bag and said ~~part~~ portion of the second bag encircled by the second fastener fastening mechanism ~~and between the front panel and said encircled part of the separate section of said second bag, outside surface.~~ said first partial bag having less capacity than the second partial bag.

2. (Withdrawn) The foldable luggage bag of claim 1 in the form of an open top tote bag wherein said second partial bag includes a bottom panel, a generally cylindrical side panel having a bottom edge attached to the bottom panel and a top edge spaced upwardly from the bottom edge, said top edge defining a top opening to the bag, at least one handle attached at the top edge, said first partial bag attached to the second bag on the side panel intermediate the bottom edge and the top edge, said second fastener mechanism attached to the outside of the side panel.

3. (Withdrawn) The bag of claim 2 wherein the first partial bag includes an outside surface with a display panel.

4. (Withdrawn) The bag of claim 2 wherein two separate handles are attached to the top edge.

5. (Currently Amended) The bag of claim 1 wherein the ~~fastener~~ fastening mechanisms each comprise a zipper mechanism.

6. (Currently Amended) The luggage bag of claim 1 in the form of a backpack, said second partial bag comprising an enclosed bag with a bottom panel, a front panel including the first partial bag, a back panel spaced from the front panel, a connecting top and side panel joined to the bottom panel, back panel and the front panel, ~~a closure mechanism in the side panel which~~

~~may be opened for access to the interior of the first and second bags~~, and at least one back strap attached to the back panel.

7. (Previously Presented) The bag of claim 6 further including first and second spaced back straps attached to the back panel.

8. (Original) The bag of claim 6 or claim 7 wherein the straps are adjustable in length.

9. (Withdrawn) The bag of claim 6 including an access mechanism in the first partial bag.

10. (Withdrawn) The bag of claim 9 wherein the access mechanism comprises a zipper.

11. (Withdrawn) The bag of claim 6 wherein the first partial bag comprises a front display panel and a circumferential side panel attached around a first edge to the front panel.

12. (Withdrawn) The bag of claim 2 including a display on the outside surface of the first bag.

13. (Previously Presented) The bag of claim 6 including a display on the outside surface of the first bag.

14. (Previously Presented) The bag of claim 6 wherein the first bag is positioned intermediate the bottom panel and top panel.

15. (Withdrawn) The bag of claim 1 including a third partial bag attached to the second partial bag on the outside surface thereof opposite the first partial bag, said third partial bag comprised of a second section of the outside surface of the second partial bag, said second section attachable about its periphery to said second bag to enclose at least a part of said second bag.

16. (New) The bag of claim 1 wherein said first partial bag has no more than about 25% of the capacity of the second partial bag.
